

Global Health Partnerships

Global Health Certificate Practicum

An integral part of the Global Health Certificate experience is the overseas practicum, a continuous 3 to 6 month experience that begins during the summer after the first year in residence at the School.

Global Health Certificate Camaraderie

Who We Are

Global Health Certificate

The Global Health Certificate, developed out of the Global Health Track that launched in 2005, is an interdepartmental professional training program designed to prepare students to become global health practitioners. This Certificate's unique interdisciplinary approach provides students with the skills to apply a global framework for analysis and action in a selected field of public health. To date, over 294 students from five departments at the Mailman School have graduated with Global Health Certificates.

Global Health Initiative

The Global Health Initiative (GHI) is committed to developing new approaches to critical global health challenges. GHI seeks to effectively mobilize the capacities of the Mailman School, as well as those of the wider Columbia University community and our partners in New York City, throughout the country, and overseas. GHI's vision is to ignite these synergies to fundamentally reshape thought and practice in the field of global health.
