

Why Recruit Our Students?

If you are seeking top talent in public health or healthcare, look no further than the Columbia University Mailman School of Public Health. Here's why:

One of the Top 5 Public Health Schools

- Ranked in the top five schools in the nation by *U.S. News & World Report* and second by *Find the Best*
- The sixth largest recipient of NIH research grant funding among all schools of public health
- Established in 1922, one of the longest-standing public health academies in the United States
- The first accredited MPH program in New York City

Innovative Curriculum and Applied Experience

- The Mailman School's interdisciplinary curriculum tackles the complex challenges of urgent health problems through comprehensive, systemic solutions—in the U.S. and abroad
- Graduates gain a unique skill set that combines leadership skills, innovation, case-based learning, and the application of science in practice
- MPH students work in groups for a full year and complete significant internship/practicum experience prior to graduation
- Certificates and specializations address the most pressing needs of the 21st century, representing in-depth knowledge in specific areas of their home department and across six disciplines
- Our nearly 500 faculty are world-renowned leaders and work in more than 100 countries, with roles that include government advisor, professional society president, international award winners, and top executives
- Degrees include MPH, MHA, MS, PhD, and DrPH
