

Anette Wu, MD, MPH '08

Term: 2013-Present

Anette is a 2008 graduate of the Executive MPH program. Anette is a physician-surgeon by training and worked in General Surgery and Transplantation Surgery in the US and in Germany. She is also trained in Basic Sciences/Transplantation Immunology and worked as a basic scientist and clinical researcher in Clinical Transplantation Surgery and Transplantation Immunology in Hannover, Germany and at Harvard University in Boston, MA.

She is a professor in the Anatomy/Pathology Department at the College of Physician and Surgeons (P&S) at Columbia University Medical Center and has been teaching Clinical Anatomy to medical students for many years. More recently she has taken on major administrative responsibilities by setting up a large Translational Research Center at Columbia University

Medical Center (~14 labs and 5 satellite units - still growing) where she is currently the Director of Operations. As a professor she likes to stay connected to teaching, educational, clinical and basic sciences research.
